

Direct expansion evaporators **REDI**

Glycol air coolers **RGDI**

Ammonia evaporators **RADI**

Main product features

Air coolers suitable for fluid **refrigerants** HFC's, glycol and NH₃

Over than 3500 different models

Cooling capacity from 15 to 90 kW (SC2 conditions)

Fans diameter 500 – 630 mm

Fin spacing 4 – 6 – 8 – 10 mm

Casing manufactured from galvanized steel with powder coating

Heat exchanger: configuration with high thickness tubes and fins for heavy applications. Optimized heat exchanger volume and innovative refrigerant distribution refrigerant.

Defrost: electric, light electric, hot gas, water, hot glycol, combined defrosts

Options: Stainless steel tubes, stainless steel casing, stainless steel fins, coil coating, EC fans, ATEX fans, reversible fans, insulated drip tray, fans ring heaters.

Special configurations please contact our sales department
